With Pad Lock System (optional)

## Front Operating Earth Switch

With Mechanical Interlocking  
With Pad Lock System (optional)

## Operational procedure for Cable Earth

### WARNING

Before applying any earth it is important to make sure the circuits are and that the operator has carefully read the relevant earth switch operating instructions, usually found stuck to panel near the earth switch.

### To apply the Cable Earth :

- Withdraw the circuit breaker from the cubicle.
- Remove the earth switch padlock.
- Insert the earth switch handle into the key slot.
- Close the earth switch.

### Note :

- With the earth switch closed, the circuit breaker cannot be inserted into the switch as the interlocking bar obstructs its movement.

### To remove the Cable Earth :

- Remove the earth switch padlock.
- Depress the earth switch release leaver whilst opening the earth switch.
- Remove the earth switch handle.
- Padlock the earth switch.

### Note :

- The circuit breaker can now be inserted into the switch cubicle.
